Jumper Specifications

For outreach points, riders cannot compete in classes bigger than .5m from where they start.

Table IV- Optimum Time - The first round is decided by adding together the faults incurred over the course and any penalties for exceeding the Time Allowed. In the case of equality of faults, ties will be broken on the following basis: an "Optimum Time" (defined as 4 seconds less than the Time Allowed for the course) will be posted on the course plan; the horse with the time on course closest to this Optimum Time (over or under) will prevail in the tie, next closest next, etc.

Table II.2.b – The first round and first jump-off, if any, are decided by adding together the faults incurred over the course and any penalties for exceeding the Time Allowed. If a competitor has gone clear in the first round, the competitor will, without leaving the ring, upon an audible signal, commence the designated jump-off course. If there are no clear rounds and a tie exists for first place, the results will be determined by the scores and time from that round. It is recommended that no more than twelve numbered obstacles be included in the first round when the class is scored under this table.

Table II.2.c – The first phase to consist of 8 to 10 jumping efforts and the second phase of 5 to 7 jumping efforts. Scores are decided by adding together the faults incurred over the course and any penalties for exceeding the Time Allowed if any. If a competitor has gone clear in the first phase, he will, upon crossing the finish line, commence the second phase course. Time starts as the horse crosses the finish line of the first phase. If there are no clear rounds and a tie exists for first place, the results will be determined by the scores and time from the first phase. The use of a Time Allowed is optional in the first phase. If a Time Allowed is not used in the first phase then those with equal faults will remain tied.

Table II.1 – The first round is decided by adding together the faults incurred over the course and any penalties for exceeding the Time Allowed. Horses with clear rounds or equal faults are classified according to their time taken to complete the course.
